SUSTAINABILITY SNAPSHOT

APPLIED COATINGS

MATERIALS

We've splashed some colour on our walls with low-VOC, Environmental Choice NZ-certified paint from Resene. We've used Ayers Rock to spice up our meeting-room doors, and deep blue-grey Gumboot on the new walls and quiet zone. To minimise our impact, we've only painted new walls and kept the existing Resene Rice Cake on all other walls. Being exposed to VOCs over a long period of time may increase the risk of health problems and worsen asthma symptoms in some people.
