SUSTAINABILITY SNAPSHOT

FURNITURE

MATERIALS

Research shows reusing products provides better environmental benefits than buying or recycling, and so a large number of items from our previous fit-out have been reused. This includes 100% of our workstations, desk drawers and chairs. New products are certified by a recognised eco-label, such as Environmental Choice NZ, and have warranty periods of greater than 10 years. An eco-label identifies a product's environmental credentials based on its life cycle.
